Irrigation techniques - Remote monitoring and control for irrigation - Part 2: Tests

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms, definitions and symbols	1
3.1	Terms and definitions	1
3.2	Symbols	2
4	Functionality	2
4.1	General	2
4.2	Power tests	3
4.2.1	Consumption	3
4.2.2	Power loss	4
4.3	Solenoid valve outputs	8
4.3.1	Opening/closing solenoid valves	8
4.3.2	Voltage and current, simulating SV	9
4.3.3	Solenoid valve pulse width duration	10
4.3.4	Short circuit and open circuit	11
4.3.5	Remote unit operation with real solenoids	13
4.3.6	Association of sensors with solenoid valve outputs	14
4.4	Counter entries	16
4.4.1	Sensor power supply	16
4.4.2	Flow calculation	16
4.4.3	High flow alarm	17
4.4.4	Low flow alarm	17
4.4.5	Hardware pulse filtering -- Maximum pulse rate and minimum pulse width	17
4.4.6	Maximum frequency between pulses	17
4.4.7	Minimum frequency between pulses	18
4.4.8	Pulse filtering by software with fixed time	18
4.4.9	Software pulse filtering with configurable time	18
4.4.10	Minimum time between pulses	19
4.4.11	Maximum time between pulses	19
4.4.12	"Open contact" test	20
4.4.13	"Closed contact" test	20
4.4.14	Random pulse counting test	21
4.4.15	Concurrent pulse count test	21
4.4.16	Counter events and alarms	21
4.5	Analogue inputs	22
4.5.1	General	22
4.5.2	Measurement accuracy	23
4.5.3	Events and alarms generated by the analogue input	24
4.6	Other inputs and outputs	27
4.6.1	Purpose of the test	27
4.6.2	External signals	27
4.6.3	Internal signals	29
4.7	Operating logic	29
4.7.1	General	29
4.7.2	Low supply voltage safety interlock (lockout) test	30

4.7.3	Low-pressure safety lockout test	30
4.7.4	Excess flow (flow rate) safety shutdown test	30
5	Robustness	31
5.1	Environmental conditions	31
5.1.1	General	31
5.1.2	Solenoid valve actuation (SV)	32
5.1.3	Counter pulses	32
5.1.4	Analogue readout	33
5.2	Power supply	33
5.2.1	Polarity reversal in main power supply	33
5.2.2	Short-circuit at the SV solenoid valve output	33
5.3	Accidental wiring errors on inputs and outputs	34
5.3.1	Purpose of the test	34
5.4	Analogue input	35
5.4.1	Overvoltage (analogue voltage input)	35
5.4.2	Overcurrent (analogue input by current)	35
5.4.3	Short circuit	36
5.5	Communications	37
5.5.1	Antenna short circuit test	37
5.5.2	Antenna open circuit test	37
5.6	Long-term behaviour	37
5.6.1	Purpose of the test	37
5.6.2	Test procedure	37
5.6.3	Acceptance criteria	38
Annex A (Informative) Questionnaire for testing irrigation control systems		39
