ISO 13164-4:2023-07 (E)

Water quality - Radon-222 - Part 4: Test method using two-phase liquid scintillation counting

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms,definitionsandsymbols 1
3.1 Terms and definitions 1
3.2 Symbols 2

4 Principle 3

5 Sampling 3
5.1 General 3
5.2 Sampling with source preparation "on site" 3
5.3 Sampling without "on site" source preparation 3

6 Reagents and apparatus 3
6.1 Reagents 3
6.2 Apparatus 4

7 Procedure 4
7.1 Preparation of calibration sources 4
7.2 Optimization of counting conditions 4
7.3 Detection efficiency 5
7.4 Blank sample preparation and measurement 5
7.5 Sample preparation and measurement 5

8 Quality assurance and quality control program 6
8.1 General 6
8.2 Variables that could influence the measurement 6
8.3 Instrument verification 6
8.4 Contamination 6
8.5 Interference control 7
8.6 Method verification 7
8.7 Demonstration of analyst capability 7

9 Expression of results 7
9.1 General 7
9.2 Count rate 7
9.3 Calculation of activity concentration per unit of mass 8
9.4 Combined uncertainty 8
9.5 Decision threshold 8
9.6 Detection limit 9
9.7 Probabilistically symmetric coverage interval 9
9.7.1 Limits of the probabilistically symmetric coverage interval 9
9.7.2 The shortest coverage interval 10
9.8 Calculations using the activity concentration 10
10 Test report 10

Annex A (informative) Set-up parameters and validation data 12
