ISO 24591-1:2024-01 (E)

Smart water management - Part 1: General guidelines and gove rnance

Contents

Page

Foreword ..... **iv**

Introduction ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms, definitions and abbreviated terms **1**
3.1 Terms and definitions 1
3.2 Abbreviated terms 3

4 General **4**
4.1 Scope for smart water management 4
4.2 Challenges and constraints 5
4.2.1 Stakeholders 5
4.2.2 Considerations and challenges 5
4.2.3 Constraints 6
4.3 Stakeholder expectations relating to smart water management 6

5 Principles and guidelines for the design of smart water management system **8**
5.1 General 8
5.2 Design scheme for smart water management systems 8
5.3 Logical architecture for smart water management systems 8
5.4 Design of logical architecture 9
5.4.1 Sensing layer 9
5.4.2 Monitoring and control layer 10
5.4.3 Application layer 10
5.4.4 Operation layer 12
5.5 Integration of smart water management systems 12

6 Principles and guidelines for operation and maintenance of smart water management systems **13**
6.1 General 13
6.2 Verification of system reliability 13
6.2.1 General 13
6.2.2 Infrastructure security 13
6.2.3 Performance indicators (PIs) 14
6.3 Emergency response plans 14
6.4 Smart water management implementation strategy 15

7 Principle and guidelines for the governance of smart water management system **15**
7.1 General 15
7.2 Leadership, roles and responsibilities 16
7.2.1 The owner of the smart water management system 16
7.2.2 The leadership team of the owner or water utility 16
7.2.3 The responsible body of the smart water management system 16
7.2.4 The operator of the smart water management system 16
7.2.5 Data management 16
7.3 Workforce organization and change management 16
7.3.1 General 16
7.3.2 Workforce organization 16
7.3.3 Change management 16

Annex A (informative) **Overview of online measurements of the sensing layer** **18**

Annex B (informative) **Cybersecurity reference model of a smart water management system** **21**

Bibliography **22**
