DIN EN 17971:2024-09 (E)

Devices for in-situ generation of biocides - Ozone

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Technology of dielectric barrier discharge to generate ozone 8

5 Distinguishing characteristics of ozone generation devices 9
5.1 General 9
5.2 Design type of the ozone generation devices 9
5.3 Operating pressure 9
5.4 Feed gas 10
5.5 Cooling of the ozone generator 10

6 Technical data of the ozone generation device 10

7 Name-plate 11

8 Equipment and materials of ozone systems 12
8.1 General 12
8.2 Equipment for the supply of feed gas 12
8.3 Equipment for cooling of the ozone generator 12
8.4 Materials 12
8.4.1 Materials for parts in contact with feed gas 12
8.4.2 Materials for parts in contact with ozone 12
8.5 Electrical equipment 12
8.6 Control and monitoring 13
8.7 Residual ozone destructor 13

9 Chemistry 13
9.1 Chemistry of ozone generation 13
9.2 Purity requirements for the feed gas 15
9.3 Chemistry of reaction by-products of ozone generation 16
9.4 Chemistry of by-products of ozone dosed in water 16

10 Device for dosing ozone 17

11 Installation site 17

12 Cooling agent 18

13 Operational safety requirements of ozone systems 18

14 Operation and maintenance 20

15 Testing of ozone generation devices for its characterization 20
15.1 General 20

15.2 Scope of testing 20
15.3 Check of documentation and design 21

16 Nominal output of the ozone generation 21
16.1 Determination of the nominal output of the ozone generation device 21
16.2 Determination of the volumetric flow rate Qout 22
16.3 Photometric determination of the ozone concentration n by UV absorption 23
16.3.1 Brief description of the method 23
16.3.2 Procedure and evaluation 25
16.4 Determination of the ozone concentration n by titration 26
16.4.1 Brief description 26
16.4.2 Apparatus 26
16.4.3 Reagents 27
16.4.4 Procedure 27
16.4.5 Evaluation 29

Annex A (informative) Examples for mixing devices 30

A.1 Mixing by injector and static mixer 30
A.2 Multiphase pumps 31
A.3 Direct injection and static mixer 31
A.4 Additional mixing methods 32

Annex B (normative) Methods to determine ozone in water 34

B.1 DPD Method 34
B.2 Indigo Method 34
B.3 potentiometric Method 35

Annex C (informative) Safety measures to prevent ozone leakages 36
