DIN EN 17899:2025-04 (E)

Water quality - Spectrophotometric determination of chlorophyll-a content by ethanol extraction for the routine monitoring of water quality

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Principle 7

5 Interferences 7

6 Reagents 7

7 Apparatus 8

8 Procedure 9
8.1 General 9
8.2 Sample pre-treatment 9
8.3 Filtration 9
8.4 Extraction 9
8.5 Measurement 10

9 Quality assurance 10
9.1 Blank values 10
9.2 pH after acidification 10
9.3 Wavelength setting 10
9.4 Ratio A/A' 11

10 Calculations 11

11 Expression of results 12

12 Test report 12

Annex A (informative) Performance data 13

A.1 Interlaboratory trial study in the Netherlands: 13
A.2 Validation interlaboratory trial in Germany: 13

Annex B (informative) Theoretical backgrounds 16

B.1 Meaning of the determination of the chlorophyll-a content 16
B.2 Acidifying extracts 16
B.3 Calculation of Phaeopigment concentration 16

Annex C (informative) Control samples 17

C.1 Introduction 17

C.2 Surface water 17
C.3 Frozen spinach extracts 17
C.4 Freeze-dried kale 17
C.5 Algae culture 18

Annex D (informative) SCOR-Unesco method for determination of chlorophyll in sea-water 19

D.1 Measurement of chlorophyll a, b, c and d with SCOR-Unesco method using chromatic equations 19
D.2 Performance characteristics and comparison of methods 20
