ISO 8259:2024-07 (E)

Soil quality - Bioaccessibility of organic and inorganic pollutants from contaminated soil and soil-like materials

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Principle of the test 2
4.1 Human digestion 2
4.2 General test description 3
4.3 Applicability 4
4.4 Substances and elements 5
4.5 Contaminated soil and soil-like materials 6

5 Sampling and pre-treatment of soil and soil-like materials 6

6 Reagents and apparatus 6
6.1 Reagents 6
6.2 Enzymes and digestive aids 7
6.3 Apparatus 7

7 Test system 7
7.1 Set-up of apparatus 7
7.2 Artificial digestive juices 8

8 Preparation and analysis of the sample 9
8.1 Sample preparation 9
8.2 Test procedure 10
8.3 Separation of dissolved contaminants from particle-bound contaminants 10
8.4 Quantification 11
8.4.1 General 11
8.4.2 Analysis of inorganic substances 11
8.4.3 Analysis of organic substances 11

9 Calculation of bioaccessibility 12

10 Quality assurance 13
10.1 General 13
10.2 Quantification of the bioaccessible content 13
10.3 Mass balance and overall recovery 13
10.4 Additional control measurements 14

11 Test report 14

Annex A (informative) Enzymes and digestive aids 16

Annex B (informative) Method performance characteristics for selected bioaccessible inorganic and organic substance fractions 17

Annex C (informative) Example of an assay with artificial digestive juices, adjusting the pH value and resulting volumes 21

Annex D (informative) Example of the extraction of polycyclic aromatic hydrocarbons (PAHs) from the gastrointestinal phase solution 22

Bibliography 26
