DIN EN 18161:2026-08 (E)

Water quality - Guidance standard on survey and monitoring freshwater mussel populations and their environment

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Taxonomic summary of the species covered in this standard 10

5 Survey and monitoring freshwater mussel populations 11
5.1 General 11
5.2 Monitoring methods for different attributes of freshwater mussel populations 11
5.3 Distribution, abundance and population size of mussels 12
5.4 Population structure: demography and recruitment 15
5.5 Brooding levels 16
5.6 Training and quality assurance for unionid mussel survey and assessment 16
5.6.1 Survey training 16
5.6.2 Training manuals 17
5.6.3 Data entry and validation 18
5.6.4 Licences 18

6 Monitoring the environmental conditions needed to support freshwater mussel populations 18
6.1 Fish hosts 18
6.1.1 General 18
6.1.2 Host fish suitability 18
6.1.3 Host fish availability 18
6.1.4 Fisheries management 19
6.1.5 Identification of problems 19
6.2 Hydromorphology 19
6.2.1 General 19
6.2.2 Fluvial systems 20
6.2.3 Standing water systems 26
6.3 Water quality 31
6.3.1 General 31
6.3.2 Temperature 31
6.3.3 pH, calcium, alkalinity 32
6.3.4 Dissolved oxygen 32
6.3.5 BOD5/COD 32
6.3.6 Electrical conductivity 32
6.3.7 Nutrients 32
6.3.8 Turbidity and suspended solids 32
6.3.9 Contaminants 33
6.4 Biotic features 33
6.4.1 General 33
6.4.2 Phytoplankton and phytobenthos 34
6.4.3 Aquatic macrophytes 34
6.4.4 Macroinvertebrates 35

6.4.5 Riparian vegetation 35
6.4.6 Predators and competitors 36
6.4.7 Parasites and diseases 36
6.4.8 Other aspects 36

7 Monitoring environmental pressures 36

8 Information needed to assess plans or projects on water bodies with freshwater mussels 38

Annex A (informative) Geographical distribution of freshwater mussel species in Europe 40
