

ISO 23611-6:2026-06 (E)

Soil quality - Sampling of soil invertebrates - Part 6: Design of sampling programmes with soil invertebrates

Contents

Page

Foreword.....	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
3.1 General terms	1
3.2 Terms related to soil protection	2
3.3 Terms related to methods	2
4 Principle	3
4.1 General	3
4.2 Questions involved in planning a field study	3
5 Objectives of sampling	4
5.1 General	4
5.2 General remarks	5
5.3 Pre-conditions	5
5.4 Performance of the site-specific assessment of contaminated land	6
5.5 Study of potential side effects of anthropogenic impacts	6
5.6 Biological classification and assessment of soils in order to determine their biological quality	6
5.7 Biogeographical monitoring in nature protection or restoration	6
6 Samples and sampling points	7
6.1 General	7
6.2 Sampling patterns	7
6.3 Selecting and identifying the sampling location	8
6.4 Preparation of the sampling site	8
6.5 Further general advice on sampling performance	8
7 Practical considerations for the biological sampling of soils	9
7.1 General	9
7.2 Formal preparations	9
7.3 Requirements on sampling personnel and safety precautions	9
7.4 Preliminary survey	9
7.4.1 General	9
7.4.2 Desk-top study	10
7.4.3 Visiting the site	10
7.5 Main study	10
8 Design options for sampling soil invertebrates	11
8.1 General	11
8.2 Description of possible sampling strategies	12
8.3 Recommendations and requirements from the European programme ENVASSO (environmental assessment of soil for monitoring)	13
9 Sampling report	15
10 Quality assurance and quality control (QA/QC)	16
Bibliography	17
