Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms, definitions and abbreviated terms 3
3.1 Terms and definitions 3
3.2 Abbreviated terms 7

4 Material 7
4.1 General 7
4.2 Compound/formulation for bases 7
4.3 Compound/formulation for riser 8
4.4 Compound/formulation for cones 8
4.5 Compound/formulation for telescopic adaptors 8
4.6 Use of non-virgin materials 9
4.7 Sealing ring retaining components 9

5 General characteristics 9
5.1 Appearance 9
5.2 Colour 9

6 Geometrical characteristics 9
6.1 Dimensions 9
6.1.1 General 9
6.1.2 Socket and spigot diameters, wall thicknesses, length of engagement (Amin) and length of horizontal spigot 10
6.2 Additional requirements 10
6.2.1 Manhole and inspection chamber tops 10
6.2.2 Manholes steps and ladders 10
6.2.3 General 10
6.2.4 Steps 10
6.2.5 Permanently fixed ladders 11
6.2.6 Fixing provisions for ladders 11

7 Mechanical characteristics 11

8 Physical characteristics 12

9 Performance requirements 13
9.1 General performance 13
9.2 Characterization of rotationally moulded product submitted for performance testing 14

10 Sealing rings 14

11 Marking of inspection chambers and manholes and additional documentation 14
11.1 Marking of bases 14
11.2 Marking of components other than bases 15
11.3 Additional documentation 16

Annex A (normative) Test method for durability 17

Annex B (normative) Structural integrity of base 19

Annex C (normative) Test method for the impact resistance of bases 20

Annex D (normative) Utilization of non-virgin material 21

Bibliography 23
