

ISO 15705:2002-11 (E)

Water quality - Determination of the chemical oxygen demand index (ST-COD) - Small-scale sealed-tube method

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Principle	2
5	Interferences	2
6	Reagents	2
7	Apparatus	5
8	Sample collection and preservation	6
9	Preparation of tubes and instrument set-up	6
10	Analytical procedure for measurement of samples	7
11	Calculation of results	8
12	Expression of results	9
13	Test report	9
14	Precision	9
Annex A (informative) Comparison between the COD method according to ISO 6060 and the method described in this International Standard		10
Annex B (informative) Hazards		11
Annex C (informative) Information on the use of commercial small-scale ST-COD test kits utilizing photometric detection		12
Annex D (informative) Low-range sealed-tube photometric method (up to 150 mg/l)		13
Annex E (informative) Low-range sealed-tube titrimetric method (up to 150 mg/l)		14
Annex F (informative) Screening test for samples with high chloride concentrations		15
Annex G (informative) Precision data		16
Bibliography		18
