|--------------------|---|-------------|
| Foreword .....     |   | iv          |
| Introduction ..... |   | v           |
| 1                  | Scope .....   | 1           |
| 2                  | Terms and definitions .....   | 1           |
| 3                  | Significance and use .....  | 1           |
| 4                  | Reagents .....  | 2           |
| 5                  | Apparatus .....   | 2           |
| 6                  | Test specimen .....   | 5           |
| 6.1                | Specimen dimensions .....   | 5           |
| 6.2                | Undisturbed specimen .....  | 5           |
| 6.3                | Laboratory-compacted specimen .....                                   | 5           |
| 6.4                | Other preparation methods .....                                       | 6           |
| 7                  | Procedure .....   | 6           |
| 7.1                | Specimen set-up .....   | 6           |
| 7.2                | Specimen soaking .....  | 6           |
| 7.3                | Back-pressure saturation .....  | 6           |
| 7.4                | Consolidation .....   | 7           |
| 7.5                | Permeation .....  | 8           |
| 7.6                | Final dimensions of the specimen .....                                | 9           |
| 8                  | Calculation .....   | 9           |
| 8.1                | Tests at constant head and constant flow rate (Methods A and D) ..... | 9           |
| 8.2                | Falling-head tests .....  | 10          |
| 9                  | Test report .....   | 12          |
| Bibliography ..... |   | 13          |
