

ISO 4064-3:2005-10 (E)

Measurement of water flow in fully charged closed conduits - Meters for cold potable water and hot water - Part 3: Test methods and equipment

Contents		Page
Foreword		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	3
4	Requirements common to all tests	3
4.1	Preliminary requirements	3
4.2	Water quality	3
4.3	Other reference conditions	4
4.4	Location	4
5	Tests to determine errors of indication	4
5.1	General	4
5.2	Principle	4
5.3	Description of the test bench	4
5.4	Pipework	5
5.5	Calibrated reference device	8
5.6	Meter reading	8
5.7	Major factors affecting the determination of errors of indication	9
5.8	Intrinsic errors (of indication)	10
5.9	Water temperature tests	11
5.10	Internal pressure tests	11
5.11	Flow reversal tests	11
5.12	Irregularity in velocity fields tests	12
5.13	Interpretation of results	14
6	Static pressure tests	14
6.1	Object of tests	14
6.2	Preparation	14
6.3	Test procedure - In-line meters	14
6.4	Test procedure - Concentric meters	14
6.5	Acceptance criteria	15
7	Pressure-loss test	15
7.1	Object of test	15
7.2	Preparation	15
7.3	Test procedure	16
7.4	Acceptance criteria	17
8	Durability tests	19
8.1	Continuous flow test	19
8.2	Discontinuous flow test	21
9	Performance tests for electronic water meters and mechanical meters fitted with electronic devices	24
9.1	Introduction	24
9.2	General requirements	25
9.3	Climatic and mechanical environment	27

9.4	Electromagnetic environment	33
9.5	Power supply	37
10	Test programme for pattern approval	43
10.1	General	43
10.2	Performance tests applicable to all water meters	44
10.3	Electronic water meters, mechanical water meters fitted with electronic devices, and their separable parts	44
10.4	Pattern approval of separable parts of a water meter	44
11	Tests for initial verification	45
11.1	General	45
11.2	Static pressure test	45
11.3	Error of indication measurements	45
11.4	Water temperature of tests	46
12	Test report	46
12.1	General	46
12.2	Pattern approval test report -- Required contents	47
Annex A (normative) Calculating the relative error of indication of a water meter		50
Annex B (normative) Flow disturbance test equipment		55
Annex C (informative) Manifold -- Examples of methods and components used for testing concentric water meters		69
