Soil quality - Sampling of soil invertebrates - Part 2: Sampling and extraction of micro-arthropods (Collembola and Acarina)

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Terms and definitions	1
3	Principle	1
4	Test materials	2
4.1	Biological material	2
4.2	Reagents	2
5	Apparatus	3
6	Procedure	4
6.1	Collecting the soil samples	4
6.2	Extracting Collembola and Acarina from soil samples	4
6.3	Sorting, preserving and identifying Collembola and Acarina	5
7	Assessment of results	6
8	Study report	6
Annex A (informative) Species determination in collembolans and mites		7
Annex B (informative) Alternative methods for sampling of micro-arthropods		9
Bibliography		10
