

# DIN EN 1622:2006-10 (E)

## Water quality - Determination of the threshold odour number (TON) and threshold flavour number (TFN)

---

| Contents   | Page |
|--|------|
| Foreword .....   | 4    |
| Introduction .....   | 5    |
| 1 Scope .....  | 6    |
| 2 Normative references .....                               | 6    |
| 3 Terms and definitions .....                              | 6    |
| 4 Principle .....  | 8    |
| 5 Hazards .....  | 8    |
| 6 Test environment .....                                   | 8    |
| 7 Apparatus and reagents .....                             | 8    |
| 8 Sampling and sample preservation .....                   | 9    |
| 9 Test panel and selected assessors .....                  | 9    |
| 10 Procedure for unforced choice .....                     | 10   |
| 10.1 General .....   | 10   |
| 10.2 Type of test .....                                    | 10   |
| 10.2.1 The triangle test .....                             | 10   |
| 10.2.2 The paired test .....                               | 10   |
| 10.3 Type of method .....                                  | 10   |
| 10.3.1 Short method .....                                  | 10   |
| 10.3.2 Full method .....                                   | 11   |
| 11 Expression of results .....                             | 13   |
| 11.1 The short method .....                                | 13   |
| 11.2 The full method .....                                 | 13   |
| 12 Test report .....                                       | 13   |
| Annex A (normative) Chlorinated water .....                | 15   |
| A.1 General .....  | 15   |
| A.2 Dechlorination by addition of sodium thiosulfate ..... | 15   |
| A.2.1 Preparation of reagent .....                         | 15   |
| A.2.2 Procedure .....                                      | 15   |
| A.3 Dechlorination by addition of ascorbic acid .....      | 15   |
| A.3.1 Preparation of reagent .....                         | 15   |
| A.3.2 Procedure .....                                      | 15   |
| Annex B (normative) Forced choice test method .....        | 16   |
| B.1 General .....  | 16   |
| B.2 Determination of TON and TFN .....                     | 16   |

|  |                                     |    |
|--|-------------------------------------|----|
| B.3  | <b>Expression of results .....</b>  | 17 |
| B.3.1  | <b>The short method .....</b>       | 17 |
| B.3.2  | <b>The full method .....</b>        | 17 |
| B.3.3  | <b>Test report .....</b>            | 17 |
| <b>Annex C (normative) Qualitative simplified procedure .....</b>  |                                     | 18 |
| <b>Annex D (informative) Method for the preparation of reference water ) .....</b>   |                                     | 19 |
| D.1  | <b>Apparatus and reagents .....</b> | 19 |
| D.2  | <b>Procedure .....</b>              | 19 |
| <b>Annex E (informative) Selection of the test panel .....</b>   |                                     | 20 |
| E.1  | <b>General .....</b>                | 20 |
| E.2  | <b>Self-evaluation .....</b>        | 20 |
| E.3  | <b>Screening test .....</b>         | 20 |
| <b>Annex F (informative) Preparation of dilutions .....</b>  |                                     | 23 |
| <b>Annex G (informative) Interlaboratory test by forced choice methodology .....</b>   |                                     | 24 |
| <b>Bibliography .....</b>  |                                     | 27 |
| <b>Figures Figure G.1 -- Graphical presentation of threshold flavour number; calculated threshold flavour number is 13,5 .....</b>   |                                     | 25 |
