## Water quality - Sampling for microbiological analysis

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1 <b>Scope</b> .....		1
2 <b>Normative references</b> .....		1
3 <b>Sampling point</b> .....		1
4 <b>Sampling technique</b> .....		2
5 <b>Transport and storage</b> .....		10
<b>Annex A (informative) A priori determination of the number of samples to analyse to determine the mean concentration of microbes in water with a given confidence, for quantitative determination derived by cultivation of microorganisms</b> .....		13
<b>Annex B (informative) Recommended (R) and acceptable (A) values for maximum sample storage times including transport time and temperatures unless otherwise specified in specific standards</b> .....		16
<b>Bibliography</b> .....		17
