ISO/TS 24137:2023-02 (E)

Plain bearings - Surface modification by press fitting solid lubricants combined with micro dimple processing

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Structure 1

5 Materials 2
5.1 Target materials 2
5.2 Solid lubricants 2

6 Process 2
6.1 General 2
6.2 Formation of dimples 3
6.2.1 General 3
6.2.2 Shot peening 3
6.2.3 Interrupted micro cutting 4
6.3 Supply of solid lubricant 5
6.4 Press fitting of solid lubricant 5

Annex A (informative) Test results 7
