

# DIN 732:2010-05 (E)

## Rolling bearings - Thermally safe operating speed - Calculation and correction values

<b>Contents</b>		<b>Page</b>
Foreword .....		3
1 <b>Scope</b> .....		4
2 <b>Normative references</b> .....		4
3 <b>Terms and definitions</b> .....		4
4 <b>Symbols and units</b> .....		5
5 <b>Calculation</b> .....		6
5.1 <b>Calculating the thermally safe operating speed n</b> .....		6
5.2 <b>Lubricant factor KL</b> .....		8
5.3 <b>Load factor KP</b> .....		8
5.4 <b>Determining the total heat emitted</b> .....		8
Annex A (informative) <b>Coefficients f0 and f1</b> .....		10
Bibliography .....		12
Figures <b>Figure 1 -- Speed ratio fn</b> .....		7
<b>Figure 2 -- Thermal transmittance kq as a function of bearing seating area AS</b> .....		9
Tables <b>Table 1 -- Symbols and units</b> .....		5
<b>Table A.1 -- Guidance values of coefficients f0 and f1</b> .....		10
