ISO 3548-3:2012-12 (E)

Plain bearings - Thin-walled half bearings with or without flange - Part 3: Measurement of peripheral length

Contents

Page

Foreword v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols 2

5 Purpose of checking 3

6 Checking methods 4
6.1 Method A 4
6.2 Method B 4

7 Choice and designation of checking method 5
7.1 Choice of checking method 5
7.2 Designation of checking method 6

8 Measuring equipment 6

9 Measuring equipment requirements 8
9.1 General 8
9.2 Tolerance on checking load setting 8
9.3 Speed of approach of measuring head 9
9.4 Construction of measuring head 9
9.5 Accuracy of the measuring plane for metering bars 9
9.6 Accuracy of the dial gauge 9

10 Gauging tools for establishing the datum 9
10.1 General 9
10.2 Master checking block (used alone) 10
10.3 Series checking block used alone 10
10.4 Series checking block with master shell 10

11 Checking block requirements 10
11.1 General 10
11.2 Reference tooling: master checking block -- General 11
11.3 Series gauging tools 13

12 Master shell and comparison shell requirements 15
12.1 Master shell requirements 15
12.2 Comparison shell requirements 17

13 Correction factors 18
13.1 Reference tooling: master checking block correction factor, Fcor,cbm 18
13.2 Series control tooling 18
13.3 Marking 19
13.4 Reference setting 19

14 Typical checking procedure 19

15 Conditions of the half bearings to be checked 20

16 Measuring errors 20
16.1 Errors due to measuring equipment 20
16.2 Errors due to the checking block 20
16.3 Errors due to the correction factor 21
16.4 Errors due to the half bearing 21
16.5 Error due to the choice of checking method 21

17 Accuracy of methods used 21
17.1 Checking conditions 21
17.2 Limits 21
17.3 Calculation 21

18 Specifications on bearing drawings 21

19 Specifications for the control of the checking means 21

Annex A (normative) Determination of the correction factor of the master checking block -- Method A 23

Annex B (normative) Determination of the correction factor of the master checking block -- Method B 27

Annex C (normative) Determination of the correction factor of the series checking block used alone 31

Annex D (normative) Determination of the correction factor of the master shell or comparison shell 33

Annex E (normative) Tests and calculation of repeatability, reproducibility and comparability 35
