

DIN ISO 4378-3:2013-12 (E)

Plain bearings - Terms, definitions, classification and symbols - Part 3: Lubrication (ISO 4378-3:2009)

Contents	Page
National foreword	3
Introduction	4
Introduction	5
Scope	6
1 General terms	7
2 Types of lubrication and classification	7
2.1 Classification according to physical state of the lubricant	7
2.2 Classification according to the mechanism of separation of the interacting surfaces by a lubricant film	8
3 Methods of lubrication and classification	13
3.1 Classification according to periodicity of application of lubricant	13
3.2 Classification according to the methods of renewing the lubricant	13
3.3 Classification according to the method of application of the lubricant to the friction surface	14
4 Lubricants, their components and types	17
4.1 Type according to the physical state of lubricant	17
4.2 Type according to the presence of additive	18
4.3 Type according to the origin of lubricant	19
4.4 Type according to the type of additive	20
4.5 Type according to the application of lubricant	23
5 Basic characteristics of lubricant	24
