National foreword 3

National Annex NA (informative) Bibliography 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Fundamental concepts 8
4.1 Bearing vibration measurement 8
4.2 Characteristics of an axis of rotation 8
4.3 Bearing error motion 9
4.4 Bearing vibration 10

5 Measurement process 11
5.1 Basis of measurement 11
5.2 Speed of rotation 11
5.3 Orientation of bearing rotational axis 11
5.4 Bearing load 11
5.5 Transducers 11

6 Measurement and evaluation methods 12
6.1 Physical quantity measured 12
6.2 Frequency domain 12
6.3 Time domain 12
6.4 Transducer response and filter characteristics 13
6.5 Method of time-averaging 14
6.6 Testing sequence 15

7 Conditions for measurement 15
7.1 Bearing conditions for measurement 15
7.2 Conditions of the test environment 15
7.3 Conditions for the test device 16
7.4 Requirements for the operator 16

8 Calibration and reference evaluation of measuring system 16
8.1 General 16
8.2 Calibration of system components 16
8.3 System performance evaluation 17

Annex A (informative) Contact resonance considerations 18
