ISO 12130-2:2001-11 (E)

Plain bearings - Hydrodynamic plain tilting pad thrust bearings under steady-state conditions - Part 2: Functions for calculation of tilting pad thrust bearings

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative reference 1

3 Functions for the tilting-pad thrust bearing 2
3.1 General 2
3.2 Characteristic value of load-carrying capacity F* as a function of the relative bearing width B/L and the relative minimum lubricant film thickness hmin/Cwed 2
3.3 Characteristic value of friction f* as a function of the relative bearing width B/L and the relative minimum lubricant film thickness hmin/Cwed 4
3.4 Relative lubricant flow rates * 1Q and * 3Q as a function of the relative bearing width B/L and the relative minimum lubricant film thickness hmin/Cwed 5
3.5 Relative pressure centre coordinate or tilting-pad supporting point * Fa as a function of the relative bearing width B/L and the relative minimum lubricant film thickness hmin/Cwed 8

4 Effective dynamic viscosity of the lubricant eff as a function of the effective lubricant film temperature Teff 10
