Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 General conditions for all methods 2

5 Measuring the heat leak by the loss of product method 3
5.1 General 3
5.2 Test procedure 3
5.3 Determination of the heat leak in units of energy per unit time 4
5.4 Determination of the heat leak as a percentage loss of product per 24 h 4

6 Determination of the holding time for open systems from heat-leak data 4

7 Holding times for closed systems 4
7.1 Determination of the equilibrium holding time from heat-leak data 4
7.2 Determination of the optimum equilibrium holding time from heat-leak data 5
7.3 Static experimental holding time 6

8 Test report 6

Annex A (normative)Conversionofmeasuredvolumetricgaseousflowtomassflow 8

Annex B (normative)Correctionofmeasuredmassflowratewithregardtodeviationfrom reference conditions 10

Annex C (normative) Equivalent loss determination for products other than the test product 16
