

DIN EN 12863:2006-02 (E)

Transportable gas cylinders - Periodic inspection and maintenance of dissolved acetylene cylinders

Contents		Page
Introduction		4
1	Scope	4
2	Normative references	4
3	Terms and definitions	5
4	General	6
5	Preparation of gas cylinder	6
6	Inspection and maintenance	8
7	Identification of content	10
8	Markings	10
9	Records	11
10	Disposal of unserviceable cylinders	11
Annex A (informative) Acetylene cylinders manufactured according to National Regulations		12
Annex B (informative) Procedure to be adopted when a cylinder valve is suspected to be obstructed		14
Annex C (normative) Description, evaluation of defects and conditions for rejection of acetylene gas cylinders at time of visual inspection		17
Annex D (informative) Tools and clearance gauges and diagrammatic illustration of the top of (monolithic and non-monolithic) acetylene cylinders		21
Annex E (informative) Inspection and maintenance of valves and their connections		22
Annex F (normative) Cracks on porous masses		23
