ISO 10297:2006-01 (E)

Transportable gas cylinders - Cylinder valves - Specification and type testing

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms, definitions and symbols 2

4 Valve design requirements 4
4.1 General 4
4.2 Description 4
4.3 Materials 4
4.4 Dimensions 5
4.5 Valve connections 5
4.6 Mechanical strength 6
4.7 Valve operating mechanism 7
4.8 Leakage 7
4.9 Resistance to ignition 8

5 Production requirements 8
5.1 Manufacturing 8
5.2 Cleaning 8

6 Type test methods 8
6.1 General 8
6.2 Documentation 9
6.3 Number of test samples 9
6.4 Test report 9
6.5 Ambient conditions 9
6.6 Valve test pressure 10
6.7 Test gas 10
6.8 Test sequence 10
6.9 Hydraulic pressure test 11
6.10 Excessive torque tests 11
6.11 Leak tightness tests 11
6.12 Endurance test 13
6.13 Flame impingement test 13
6.14 Oxygen pressure surge test 13
6.15 Acetylene flashback test 16

7 Marking 18

Annex A (normative) Valve impact test 19

Annex B (informative) Example of test sequence 21

Annex C (normative) Endurance test 22
