Foreword iv

Introduction v

1 Scope 1

2 Terms and definitions 1

3 General conditions for all methods 2

4 Measuring the heat leak by the loss of product method 3
4.1 General 3
4.2 Test procedure 3
4.3 Determination of the heat leak in units of energy per unit time 4
4.4 Determination of the heat leak as a percentage loss of product per 24 h 4

5 Determination of the holding time for open systems from heat-leak data 4

6 Holding times for closed systems 5
6.1 Determination of the equilibrium holding time from heat-leak data 5
6.2 Calculation of the equilibrium holding time from heat-leak data 5
6.3 Static experimental holding time 6

7 Test report 7

Annex A (normative) Conversion of measured volumetric gaseous flow to mass flow 8

Annex B (normative) Correction of measured mass flow rate with regard to deviation from reference conditions 9

Annex C (normative) Equivalent loss determination for products other than the test product 14
