

DIN 22131-3:2016-03 (E)

Steelcord conveyor belts for hoisting and conveying - P art 3: Testing

Contents

Page

Foreword	3
1 Scope	4
2 Normative references	4
3 Testing	4
3.1 Test pieces.....	4
3.2 General, sample number, evaluation	5
3.3 Delivery condition, thermal after-treatment and ageing	5
3.3.1 Delivery condition.....	5
3.3.2 Thermal after-treatment	5
3.3.3 Artificial ageing	5
3.4 Dimensions	5
3.4.1 Belt width	5
3.4.2 Belt thickness, cover thickness.....	6
3.4.3 Cord diameter, number of cords.....	6
3.4.4 Determining the horizontal and vertical position of the steel cords and pitch.....	6
3.5 Breaking strength of the steel cord.....	6
3.6 Determining the indentation hardness of the cover	6
3.7 Cord pull-out force	6
3.7.1 Static cord pull-out force	6
3.7.2 Tensile test using pulsation.....	6
3.8 Cohesion resistance T between rubber cover and rubber core	8
3.9 Tear resistance and elongation of the rubber covers	8
3.10 Abrasion of the rubber covers	8
3.11 Other tests.....	8
3.11.1 General	8
3.11.2 Transverse flexibility (troughability).....	8
3.11.3 Breaking strength F_{bs} of the vulcanized steel cord.....	8
3.11.4 Electrical and flammability safety requirements.....	9
4 Inspection documents.....	9
