ISO 8664:2018 (E)

Tyres for agricultural tractors and machines — Code-designated and service-description marked radial drive-wheel tyres

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Tyre marking

- 4.1 General
- 4.2 Supplementary service description
- 4.3 Additional information
- 4.4 Tyre classification and nomenclature
- 4.5 Tyre maximum pressure for bead seating pictogram

5 Tyre dimensions

6 Tyre load ratings

7 Tyre applications other than at reference speed

- 7.1 General
- 7.2 Field applications with high and sustained torque
- 7.3 Tyres marked with additional service description

8 Tyre application on combine harvesters

9 Tyre parameters for vehicle speed reference

Annex A (normative) Tyre size designations, measurement rims and tyre dimensions

Annex B (normative) Load index and basic tyre load with reference inflation pressures 120 kPa, 160 kPa, 210 kPa and 250 kPa

Annex C (normative) Approved rim contours

Annex D (normative) Rolling circumference (RC), rolling circumference index (RCI) and speed radius index (SRI)
