ISO 8031:2020 (E)

Rubber and plastics hoses and hose assemblies — Determination of electrical resistance and conductivity

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Measurement of resistance of conductive, antistatic and non-conductive hoses

4.1 General
4.2 Apparatus
4.2.1 Test instruments
4.2.2 Electrodes and contacts
4.2.2.1 General
4.2.2.2 Special electrodes and contacts
4.3 Preparation and cleaning for the test
4.4 Conditioning
4.5 Procedure for hoses with conducting lining (on full hose length)
4.6 Procedure for hoses with conducting cover
4.6.1 Method for full hose lengths
4.6.2 Method for test pieces as tested in the laboratory
4.6.2.1 Test pieces
4.6.2.2 Test procedure
4.7 Procedure for hoses with conducting compounds throughout
4.7.1 Method for hoses up to 6 m in length
4.7.2 Method for hoses over 6 m in length
4.8 Hose assemblies fitted with metal end fittings
4.9 Test procedure to determine the electrical resistance through the wall of hoses and hose assemblies
4.9.1 General
4.9.2 Test procedure for hoses (without end fittings)
4.9.2.1 Preparation for the test
4.9.2.2 Electrodes and contacts
4.9.2.3 Preparation and cleaning for test
4.9.2.4 Conditioning
4.9.2.5 Test procedure
4.9.3 Test procedure for hose assemblies with metallic end fittings but without an internal wire helix in contact with the end fittings
4.9.3.1 Electrodes and contacts
4.9.3.2 Preparation and cleaning for test
4.9.3.3 Conditioning
4.9.3.4 Test procedure

5 Measurement of electrical continuity between metal end fittings of hose assemblies

6 Measurement of electrical discontinuity of hose assemblies

7 Measurement of electrical resistance of a hose assembly lining (conductive or static dissipating) or hose assembly cover (conductive or static dissipating) in contact with the metal end fitting

7.1 General

7.2 Apparatus
7.3 Preparation and cleaning for the test
7.4 Conditioning
7.5 Test procedure

8 Test report

Annex A (informative) Recommended terminology and limits for electrical conductivity and resistance
