DIN 7863-3:2022-02 (E)

Elastomer glazing and panel gaskets for windows and claddings - Material requirements - Part 3: TPE glazing gaskets

Contents

Page

Foreword ... 3

1 Scope ... 4

2 Normative references ... 4

3 Terms and definitions ... 5

4 Classification ... 5
4.1 General ... 5
4.2 Temperature classes ... 5
4.3 Application classes ... 5

5 Requirements ... 5
5.1 Material requirements ... 5
5.2 Compatibility with adjacent materials ... 7

6 Shape and dimensions of gaskets ... 7

7 Test methods ... 8
7.1 General ... 8
7.2 Hardness ... 8
7.3 Tensile strength and elongation at break ... 8
7.4 Compression set at ambient or elevated temperatures ... 8
7.5 Compression set at low temperatures ... 8
7.6 Artificial ageing ... 8
7.7 Change in hardness after cold storage ... 9
7.8 Behaviour after ozone exposure ... 9
7.9 Compatibility with contact media ... 9
7.10 Fire behaviour ... 9

8 Test report ... 9

Tables

Table 1 — Requirements for TPE materials of temperature class –25 °C to +100 °C for gaskets in window applications ... 6

Table 2 — Requirements for TPE materials of temperature class –25 °C to +70 °C for gaskets in window applications ... 7
