DIN 7863-4:2023-10 (E)

Elastomer glazing and panel gaskets for windows and claddings - Material requirements - Part 4: PVC-P glazing and panel gaskets

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 5

4 Classification 5
4.1 General 5
4.2 Temperature classes 5
4.3 Application classes 5

5 Requirements 5
5.1 Material requirements 5
5.2 Compatibility with adjacent materials 6

6 Shape and dimensions of gaskets 6

7 Test method 7
7.1 General 7
7.2 Hardness 7
7.3 Tensile strength and elongation at break 7
7.4 Compression set at ambient or elevated temperatures 7
7.5 Compression set at low temperatures 7
7.6 Artificial ageing 7
7.7 Behaviour after ozone exposure 7
7.8 Compatibility with contact media 8
7.9 Reaction to fire 8

8 Test report 8

Bibliography 9

Tables Table 1 -- Requirements for PVC-P materials of temperature class -25 °C to +70 °C for gaskets in window applications 6
