|-------------------------|---|-------------|
| European foreword ..... |   | 4           |
| Introduction .....      |   | 5           |
| 1                       | Scope .....   | 6           |
| 2                       | Normative references .....  | 6           |
| 3                       | Terms and definitions .....   | 6           |
| 4                       | Principle .....   | 7           |
| 5                       | Test materials .....  | 7           |
| 5.1                     | Biological material .....   | 7           |
| 5.1.1                   | <i>Hylotrupes bajulus</i> (Linnaeus) larvae .....                                     | 7           |
| 5.1.2                   | Source of larvae .....  | 7           |
| 5.1.3                   | Provision of larvae .....   | 7           |
| 5.1.4                   | Choice of larvae .....  | 7           |
| 5.2                     | Products and reagents .....   | 8           |
| 5.3                     | Apparatus .....   | 8           |
| 6                       | Sampling .....  | 9           |
| 7                       | Test specimens .....  | 9           |
| 7.1                     | Species of wood .....   | 9           |
| 7.2                     | Wood quality .....  | 9           |
| 7.3                     | Provision of test specimens .....   | 9           |
| 7.4                     | Dimensions of test specimens .....  | 10          |
| 7.5                     | Number of test specimens .....  | 10          |
| 7.5.1                   | For fast and slow acting wood preservatives, test duration 12 weeks or 24 weeks ..... | 10          |
| 7.5.2                   | For deferred acting wood preservatives, test duration 52 weeks .....                  | 10          |
| 8                       | Procedure .....   | 10          |
| 8.1                     | Preparation of the test specimens .....   | 10          |
| 8.2                     | Insertion of larvae into the test specimens .....                                     | 12          |
| 8.3                     | Sealing of the surfaces not to be treated .....                                       | 12          |
| 8.4                     | Incubation of the test specimens .....  | 12          |
| 8.5                     | Treatment of test specimens .....   | 12          |
| 8.5.1                   | Preparation of the treatment solution .....   | 12          |
| 8.5.2                   | Application of the treatment solution .....   | 13          |
| 8.6                     | Drying of the test specimens .....  | 13          |
| 8.7                     | Duration of test .....  | 14          |
| 8.8                     | Examination of the test specimens .....   | 14          |
| 8.8.1                   | Examination without radiography .....   | 14          |
| 8.8.2                   | Examination with radiography (optional) .....   | 15          |
| 8.8.3                   | Expression of examination .....   | 15          |
| 9                       | Validity of the test .....  | 15          |
| 10                      | Expression of results .....   | 15          |
