Page

European foreword.....	6
Introduction	7
1 Scope	9
2 Normative references.....	9
3 Terms and definitions	10
4 Symbols and abbreviations	11
5 General.....	12
5.1 Modes of operation.....	12
5.2 Meter communications types.....	13
5.3 Performance Classes.....	15
6 Mode S.....	16
6.1 Channel properties.....	16
6.2 Transmitter	17
6.3 Receiver.....	18
6.4 Data encoding and preamble	19
6.4.1 Data encoding.....	19
6.4.2 Order of transmission of the encoded data	19
6.4.3 Preamble and synchronization pattern	19
7 Mode T.....	19
7.1 Channel properties.....	19
7.2 Transmitter	19
7.3 Receiver (T2 only)	21
7.4 Data encoding and preamble	22
7.4.1 General.....	22
7.4.2 Meter transmit, "3 out of 6" data encoding.....	22
7.4.3 Other Device transmit, Manchester encoding	24
8 Mode R2.....	24
8.1 Channel properties.....	24
8.2 Transmitter	24
8.3 Receiver.....	25
8.4 Data encoding and preamble	26
8.4.1 Data encoding.....	26
8.4.2 Order of transmission of the encoded data	26
8.4.3 Preamble and synchronization pattern	26
9 Mode C.....	27
9.1 Channel properties.....	27
9.2 Transmitter	27
9.3 Receiver.....	28
9.4 Data encoding and preamble	29
9.4.1 Encoding.....	29
9.4.2 Preamble and synchronization pattern	29

10	Mode N	30
10.1	Channel properties	30
10.2	Physical link parameters	31
10.3	Receiver sensitivity	34
10.4	Data encoding and preamble	35
10.4.1	Encoding	35
10.4.2	Preamble and synchronization pattern	35
11	Mode F	36
11.1	Channel properties	36
11.2	Physical link parameters	36
11.3	Receiver sensitivity	38
11.4	Data encoding and preamble	38
11.4.1	Data Encoding	38
11.4.2	Preamble and synchronization pattern	38
12	Data Link Layer	38
12.1	General	38
12.2	Order of multi byte fields	39
12.3	Frame format A	39
12.4	Frame format B	39
12.5	Field definitions	40
12.5.1	General	40
12.5.2	Multi byte fields	40
12.5.3	Length field (L-Field)	40
12.5.4	Control field (C-Field)	40
12.5.5	Manufacturer ID (M-field)	42
12.5.6	Address (A-field)	43
12.5.7	Cyclic redundancy check (CRC-field)	43
12.5.8	Control information field (CI-field)	43
12.6	Timing	43
12.6.1	Timing for installation messages	43
12.6.2	Synchronous transmissions of meter messages	44
12.6.3	Access timing	45
12.7	Repeated or duplicate messages	47
12.8	Forward Error Correction (FEC)	47
12.8.1	Overview	47
12.8.2	Datagram structure	47
12.8.3	FEC Algorithm	48
13	Connection to higher protocol layers	49
13.1	The Control Information Field (CI-field)	49
13.2	CI -fields for the Extended Link Layer	50
13.2.1	General	50
13.2.2	CI-field = 8C_h	51
13.2.3	CI-field = 8D_h	51
13.2.4	CI-field = 8E_h	51
13.2.5	CI-field = 8F_h	52
13.2.6	CI-field = 86_h	52
13.2.7	Communication Control Field (CC-field)	53
13.2.8	Access Number Field (ACC-field)	55
13.2.9	Manufacturer ID 2 (M2-field)	55
13.2.10	Address 2 (A2-field)	55

13.2.11	Session Number Field (SN-field).....	55
13.2.12	AES-128 Counter Mode Encryption	56
13.2.13	Run Time Delay field (RTD-field).....	57
13.2.14	Reception Level field (RXL-field)	57
13.2.15	Payload Checksum Field (PayloadCRC-field).....	59
13.3	CI-fields for the Transport Layer.....	59
13.3.1	General.....	59
13.3.2	Short Transport Layer.....	59
13.3.3	Long Transport Layer.....	60
14	Management functions for link control	60
14.1	General.....	60
14.2	Set Radio Parameters	63
14.2.1	General.....	63
14.2.2	Command	63
14.2.3	Response	67
14.3	Get Radio Parameters.....	69
14.3.1	General.....	69
14.3.2	Command	69
14.3.3	Response	69
14.4	Set limited radio parameters.....	71
14.4.1	General.....	71
14.4.2	Command	71
14.4.3	Response	72
14.5	Confirm Radio Parameters	72
14.5.1	General.....	72
14.5.2	Command	73
14.5.3	Response:.....	73
14.6	Set manufacturer specific parameters	74
14.6.1	General.....	74
14.6.2	Command	74
14.6.3	Response	75
Annex A	(informative) Frequency allocation and band usage for the 868 MHz band.....	76
Annex B	(informative) Frequency allocation for the 169 MHz band.....	77
B.1	Frequencies and allowed power levels.....	77
B.2	Frequencies and allowed duty cycles	77
Annex C	(informative) Frame examples.....	79
C.1	Example of a frame from a meter in mode S.....	79
C.1.1	Conditions.....	79
C.1.2	Block content.....	79
C.1.3	Bit string.....	80
C.2	Example of a frame from a meter in mode T1	80
C.2.1	Condition.....	80
C.2.2	Block Content.....	81
C.2.3	Bit string.....	82
C.3	Example of a frame from a meter in mode C1.....	82
C.3.1	Conditions.....	82
C.3.2	Block content.....	83
C.3.3	Bit string.....	83
Annex D	(informative) Example of predictive reception of synchronous messages	84
Annex E	(informative) Timing diagrams	85
Annex F	(informative) Counter Mode Flow	99
