

DIN EN 1434-3:2009-01 (E)

Heat meters - Part 3: Data exchange and interfaces; English version EN 1434-3:2008

Inhalt	Seite
Foreword	4
1 Scope	5
2 Normative references	5
3 Meter interfaces and protocols overview	6
4 Physical layer	6
4.1 General	6
4.2 Physical layer optical interface	6
4.3 Physical layer M-Bus	6
4.4 Physical layer wireless interface	7
4.5 Physical layer current loop interface	7
4.6 Physical layer Local Bus	7
5 Link layer	7
5.1.1 Link layer optical interface with the EN 13757-2 protocol	7
5.1.2 Link layer optical interface with the EN 62056-21 protocol	7
5.1.3 Link layer optical interface with automatic protocol recognition	7
5.2 Link layer of M-Bus and Local Bus	7
5.3 Link layer wireless interface	7
5.4 Link layer current-loop interface	8
6 Application layer	8
6.1 Application layer optical interface	8
6.1.1 Protocol modes according to EN 13757-3 for heat meters	8
6.1.2 Protocol modes according to EN 62056-21 for heat meters	8
6.2 Application layer M-Bus and Local Bus	9
6.2.1 General	9
6.2.2 Coding of data records	9
7 Application	9
7.1 General	9
7.2 Physical layer	9
7.3 Link layer	9
7.4 Application layer	9
7.5 Control applications	9
Annex A (informative) Recommendation for heat meter test interface	10
Annex B (informative) Additional information for heat meters	11
B.1 Additional information regarding the EN 62056-21 protocol	11
B.2 Data set	11
B.3 Coding of the data set identification number	12
B.3.1 Schematic structure	12
B.3.2 Values for "T" group code	12
B.3.3 Values for "UU", register codes	12
B.3.4 Values for "W", number of the tariff	15
B.3.5 Use of "*/&" and "VV" for prestored values	15
B.3.6 Coding of the unit in the data set	16
B.3.7 Coding of the value in the data set	16
B.3.8 Coding of the measured value	17
B.3.9 Coding of the error message	17
B.3.10 Coding of the date and/or time stamp	17
B.3.11 Presentation of related values	18

Annex C (informative) Automatic protocol detection and wake-up for the optical interface	19
Annex D (informative) Usage of heat meters in control applications	21
D.1 Heat meter	21
D.1.1 General.....	21
D.1.2 Application layer: data records	21
D.1.3 Application: actuality of the data	21
D.1.4 Application layer: acceptable data types (DIFs).....	22
D.1.5 Application layer: acceptable units (VIFs)	22
D.2 Controller.....	22
D.2.1 Start until first answer.....	22
D.2.2 Start until first successful readout	23
Annex E (informative) Protection techniques for M-Bus meters against surge/lightning.....	24
Annex F (informative) Additional information about the master-unit for the M-Bus.....	29
F.1 Master side interface to the M-Bus	29
F.2 Master side interface for local data read out	29
F.3 Full size level converter	30
Bibliography	32
