

# DIN EN 12977-5:2012-06 (E)

## Thermal solar systems and components - Custom built systems - Part 5: Performance test methods for control equipment

---

Contents	Page
Foreword .....	4
Introduction .....	5
1 Scope .....	6
2 Normative references .....	7
3 Terms and definitions .....	8
4 Symbols and abbreviations .....	9
5 Controller classification (including equipment classification) .....	9
5.1 Controller .....	9
5.2 Sensor .....	10
5.3 Actuator .....	10
6 Requirements .....	11
6.1 General requirements .....	11
6.2 Controllers, system clocks, timers and counters .....	12
6.3 Sensors .....	12
6.4 Indicators .....	15
6.5 Actuators .....	15
6.6 Initial operation and commissioning .....	16
6.7 Documentation .....	16
7 Testing of sensors .....	17
7.1 General .....	17
7.2 Testing of temperature sensors .....	17
7.3 Testing of solar irradiance sensors .....	21
7.4 Testing of further sensors and measuring equipment .....	25
8 Testing of system clocks, timers and counters .....	25
8.1 General .....	25
8.2 Test equipment .....	25
8.3 Installation of system clocks, timers and counters .....	25
8.4 Test procedure .....	26
8.5 Data processing and evaluation .....	26
9 Function testing of simple differential thermostats .....	27
9.1 General .....	27
9.2 Test equipment .....	27
9.3 Installation of differential thermostats and/or sensors .....	29
9.4 Test procedure .....	29
10 Function testing of multi-function controllers .....	31
10.1 General .....	31
10.2 Principle of multi-function controller testing .....	32
10.3 Intellectual property of the manufacturer .....	32
10.4 Test facility for multi-function controller testing .....	32
Preliminary steps when using a test facility provided with an input/output emulator .....	34

10.6	<b>Test procedure .....</b>	37
10.7	<b>Data acquisition and processing .....</b>	39
11	<b>Testing of actuators and additional control equipment .....</b>	40
11.1	<b>General .....</b>	40
11.2	<b>Determination of the electric power consumption of actuators and further components ..</b>	40
11.3	<b>Measuring the electric power of pumps with varying power consumption .....</b>	40
12	<b>Documentation .....</b>	40
12.1	<b>General .....</b>	40
12.2	<b>General information .....</b>	40
12.3	<b>Marking .....</b>	40
12.4	<b>Information for the installer, assembly and installation .....</b>	41
12.5	<b>Information for the user, operation and maintenance .....</b>	41
13	<b>Test report .....</b>	42
<b>Annex A (informative) Testing the electrical supply voltage dependence of control equipment .....</b>		43
A.1	<b>General .....</b>	43
A.2	<b>Test equipment .....</b>	43
A.3	<b>Test procedure .....</b>	43
A.4	<b>Data processing .....</b>	44
<b>Bibliography .....</b>		45
<b>Figures</b> <b>Figure 1 -- Elevation of an oven-arrangement to test temperature sensor accuracy, high-temperature resistance and differential thermostat functions .....</b>		18
<b>Figure 2 -- Example of a simulation box for testing differential thermostats of solar heating systems .....</b>		28
<b>Figure 3 -- Schematic of a controller test facility including an input/output emulator .....</b>		34
<b>Figure 4 -- Flow chart of steps when using a test facility provided with an input/output emulator according to Figure 3 .....</b>		35
<b>Tables</b> <b>Table 1 -- Classification of controllers for solar heating systems .....</b>		9
<b>Table 2 -- Common sensors for solar heating systems .....</b>		10
<b>Table 3 -- Most common actuators for solar heating systems .....</b>		10
<b>Table 4 -- Accuracy of system clocks, timers and counters .....</b>		12
<b>Table 5 -- Accuracy requirements of temperature sensors for solar heating systems .....</b>		13
<b>Table 6 -- Requirements of high-temperature resistance of temperature sensors .....</b>		13
<b>Table 7 -- Climate test conditions for solar irradiance sensors capability to resist to high irradiance .....</b>		14
<b>Table 8 -- Climate test conditions for solar irradiance sensors capability to resist to high surrounding temperatures .....</b>		14
<b>Table 9 -- Accuracy requirements for solar irradiance sensors .....</b>		14
<b>Table 10 -- Total maximum electrical power of the pump(s) .....</b>		15
<b>Table 11 -- Temperatures to be used for the accuracy test .....</b>		20
<b>Table 12 -- Minimum climate test conditions for exposure and for external shock test .....</b>		23

<b>Table 13 -- Irradiance levels to test the accuracy of solar irradiance sensors .....</b>	<b>24</b>
<b>Table 14 -- Examples of control algorithms and corresponding test sequences for multi-function controllers .....</b>	<b>38</b>
