ISO 11855-4:2012-08 (E)

Building environment design - Design, dimensioning, installation and control of embedded radiant heating and cooling systems - Part 4: Dimensioning and calculation of the dynamic heating and cooling capacity of Thermo Active Building Systems (TABS)

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols and abbreviations 1

5 The concept of Thermally Active Surfaces (TAS) 6

6 Calculation methods 11
6.1 General 11
6.2 Rough sizing method 12
6.3 Simplified sizing by diagrams 13
6.4 Simplified model based on finite difference method (FDM) 19
6.4.1 Cooling system 20
6.4.2 Hydraulic circuit and slab 20
6.4.3 Room 22
6.4.4 Limits of the method 24
6.5 Dynamic building simulation programs 25

7 Input for computer simulations of energy performance 25

Annex A (informative) Simplified diagrams 26

Annex B (normative) Calculation method 31

B.1. Pipe level 31
B.2. Thermal nodes composing the slab and room 31
B.3. Calculations for the generic h-th hour 35
B.4 Sizing of the system 41

Annex C (informative) Tutorial guide for assessing the model 42

Annex D (informative) Computer program 44

Bibliography 52
