DIN EN 1264-2:2013-03 (E)

Water based surface embed ded heating and cooling systems - Part 2: Floor heating: Prove methods for the determination of the thermal output using calculation and test methods (includes Amendment A1:2012)

Contents

Page

Foreword ... 3

Introduction ... 4

1 Scope ... 5

2 Normative references ... 5

3 Definitions and symbols ... 5

4 Thermal boundary conditions ... 5

5 Documents for testing ... 6

6 Calculation of the specific thermal output (characteristic curves and limit curves) ... 7
6.1 General approach (see [2], [4]) ... 7
6.2 Systems with pipes installed inside the screed (type A and type C) ... 8
6.3 Systems with pipes installed below the screed or timber floor (type B) ... 9
6.4 Systems with surface elements (plane section systems, type D) ... 11
6.5 Limits of the specific thermal output ... 11
6.6 Influence of pipe material, pipe wall thickness and pipe sheathing on the specific thermal output ... 13
6.7 Heat conductivity of screed with inserts ... 14

7 Heat conductivity of the materials ... 14

8 Downward heat loss ... 14

9 Test procedure for the determination of the thermal output of systems that cannot be calculated in accordance with Clause 6 ... 15

10 Test procedure for the determination of the effective thermal resistance of carpets ... 18

11 Prove report ... 19

12 Prove system ... 20
12.1 General ... 20
12.2 Master samples ... 20
12.3 Verification of test equipments ... 21
12.4 Determination of the values s_m and $\phi_{M,s}$ ($q_{N,M,s}$, $q_{G,M,s}(R_{\lambda;B}=0,15)$, $R_{\lambda,B,M,s}$) of primary master samples ... 21
12.5 Verification of software ... 21

Annex A (normative) **Figures and tables** ... 23

Annex B (informative) **Test procedure for the determination of parameters for application in EN 15377-1:2008 Annex C** ... 40

Annex C (informative) **A1 Influence of the heat exchange coefficient inside the pipe on the specific thermal output A1** ... 43

Bibliography ... 44
