DIN EN 14037-2:2016-12 (E)

Free hanging heating and cooling surfaces for water with a temperature be low 120 Â°C - Part 2: Pre-fabricated ceiling mounted radiant panels for space heating - Test method for thermal output

Contents

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Testing of thermal output 6

5 Test booth 6
5.1 General 6
5.2 Dimensions of the test booth 7
5.3 Emissivity of the inside surrounding surfaces 8
5.4 Tightness of the test booth 8
5.5 Cooling system 8
5.6 Temperature measuring points 8
5.6.1 Reference room temperature 8
5.6.2 Air temperature 9
5.6.3 Surface temperature of the inside surfaces 10

6 Master Panels 11
6.1 Introduction 11
6.2 General 11
6.3 Determination of the value M,s of master panels (Primary set) 11
6.4 Construction details 11
6.4.1 Dimensions 11
6.4.2 Material 11
6.4.3 Construction 11
6.4.4 Dimensional verification 11
6.5 Verification of test installation, repeatability and reproducibility 17

7 Test methods 17
7.1 General 17
7.2 Weighing method 18
7.3 Measurement of the inlet and outlet temperatures 19
7.4 Measurement of the control temperatures 19
7.5 Uncertainty of the measured thermal output 19
7.6 Air pressure 19

8 Carrying out the measurement 20
8.1 General 20
8.2 Dimensions and construction of the test samples 20
8.3 Selection of the models to be tested for determining the thermal output of a type 20
8.4 Manufacturer documents for the test samples 20
8.5 Arrangement of the sample in the test booth 20
8.6 Upper insulation of the test sample 22

8.7 Connection of the test sample to the measuring circuit 22
8.8 Tests 22
8.9 Mass flow 23
8.10 Test temperatures 23
8.11 Steady-state conditions 23
8.12 Correction due to the air pressure 23
8.13 Result of measurement - Characteristic equation 23

9 Test report 24
9.1 General 24
9.2 Data 24

Annex A (normative) Dimensional verification of master panels 26

A.1 General 26
A.2 Determination M,s -values of the master panels (primary set) 26
A.3 Dimensional verification and manufacturing certification for master panel 1 26
A.4 Dimensional verification and manufacturing certification for master panel 2 28

Annex B (informative) Temperature measuring device 31

Annex C (normative) Least squares regression for a model 32

Annex D (informative) Specimen of the test report for heating capacity 33
