ISO 9459-4:2013-02 (E)

Solar heating - Domestic water heating systems - Part 4: System performance characterization by means of component tests and comp uter simulation

Contents

Page

Foreword iv

0 Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols, units and nomenclature 3

5 Application 6

6 Test method 7
6.1 Introduction 7
6.2 Component testing 7
6.3 Water heater configuration for modelling 9

7 Performance evaluation 10
7.1 Annual task performance 10
7.2 Weather data 10
7.3 Thermal energy loads 11
7.4 Thermostat set temperature 11
7.5 Cold water inlet temperature 11
7.6 Pump circulation control 11
7.7 Simulation deck setup for modelling thermal stratification in storage tanks 12
7.8 Piping configuration for solar water heaters 13
7.9 Controllers 14
7.10 Energy consumed for freeze protection 14
7.11 Over-temperature control 15
7.12 Modelling gas storage water heaters 15
7.13 Modelling instantaneous gas water heaters 16
7.14 Presentation of results 17
7.15 Extension of simulation model for new products 19

Annex A (normative) Water heater parameters 20

Annex B (normative) Storage vessel performance 34

Annex C (normative) Integral collector storage unit test method 37

Annex D (normative) Corrections for effect of hail guards on solar collector efficiency 41

Annex E (normative) PV powered DC pumps in solar water heating systems 43

Annex F (normative) Heat exchanger test methods 50

Annex G (normative) Reference conditions for testing and performance prediction 58

Annex H (informative) Example simulation models 63

Annex I (informative) Guidelines for equipment suppliers 67

Annex J (informative) Guidelines for Certification Bodies 68
