

DIN EN ISO 22975-3:2014-10 (E)

Solar energy - Collector components and materials - Part 3: Absorber surface durability (ISO 22975-3:2014)

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	5
4	Requirements and classification	6
5	Test methods for assessing material properties as measure of absorber performance	7
5.1	Sampling and preparation of test specimens	7
5.2	Sample conditioning	8
5.3	Solar absorptance	8
5.4	Thermal emittance	8
5.5	Adhesion	8
6	Tests for assessing the thermal stability of absorber surfaces	8
6.1	Principle	8
6.2	Apparatus	9
6.3	Procedure for execution of high temperature tests	10
6.4	Qualification procedure	11
7	Tests for determining the resistance to condensed water of absorber surfaces	11
7.1	Principle	11
7.2	Apparatus	12
7.3	Procedure for execution of constant condensation tests	13
7.4	Qualification procedure	14
8	Test for determining absorber surface corrosion resistance to high humidity air containing sulfur dioxide	14
8.1	Principle	14
8.2	Apparatus	15
8.3	Reference test specimen	16
8.4	Procedure for execution of corrosion test in high humidity air containing sulfur dioxide ..	16
8.5	Determination of shortest acceptable failure times in test by use of reference test specimens	17
8.6	Qualification procedure	17
9	Test report	18
Annex A (normative)	Procedure for determination of solar absorption and thermal emittance of absorber surfaces	19
Annex B (normative)	Temperature and failure time characteristics in assessment of thermal stability of absorber surface	23

Annex C (normative) Temperature/condensation and failure time characteristics together with qualification scheme in assessment of resistance to condensed water of absorber surface	29
Annex D (informative) Suitable designs for test apparatus to be used in the qualification testing of solar absorber surfaces	32
Bibliography	34
