DIN EN 15316-4-10:2017-09 (E)

Energy performance of buildings - Method for calculation of system energy requirements and system eff iciencies - Part 4-10: Wind power generation systems, Module M11-8-7

Contents

Page

European foreword 3

Introduction 4

1 Scope 5

2 Normative references 7

3 Terms and definitions 7

4 Symbols and abbreviations 8

5 Wind power systems (WPS) 8
5.1 Input quantities from other parts of the heating system standards 8
5.2 Output quantities from other parts of the heating system standards 9
5.3 Monthly mean wind velocity v1 in m/s 9
5.4 Determination of the WPS and hub height 9
5.5 Determination of the wind power in the respective month 9
5.6 Determination of the WPS capacity 10
5.7 Mean monthly operating time t in h/mth 11
5.8 Determination of the monthly yield 11

Annex A (informative) Additional values for parametering the WPS 12

Annex B (informative) Additional default values for parametering the WPS 13

Annex C (informative) Calculation example 14
