DIN EN 16946-1:2017-10 (E)

Energy Performance of Buildings - Inspection of Automation, Controls and Technical Building Management - Part 1: Mod ule M10-11

Contents

Page

European foreword 3

Introduction 4

1 Scope 5

2 Normative references 7

3 Terms and definitions 7

4 Overview 7

5 Inspection method 8
5.1 General 8
5.2 Inspection procedure 8
5.3 Major steps in the inspection 8
5.4 Determination of energy efficiency contribution 8
5.5 Weighting among building types 9
5.6 BAC overall energy performance scale and evaluation 9

6 Inspection of a BAC in the phases of BAC project 9
6.1 General 9
6.2 Design phase 10
6.3 Engineering phase 10
6.4 Installation phase 10
6.5 Completion phase 11
6.6 Documentation 11
6.7 Operator instruction (training) 11
6.8 Review and improve building performance 12
6.9 Inspection of BACS sometime after the handover 12

Annex A (informative) Audit Processes 13

Annex B (informative) Schematic supply flow and controls functions influencing the efficiency 14

Annex C (informative) Key Performance Indicators 15

C.1 General 15
C.2 Characteristics of KPI's 15
C.3 Gathering and evaluation method 15
