| European foreword .....   |   | 3           |
| Introduction .....  |   | 4           |
| 1   | Scope .....   | 6           |
| 2   | Normative references .....                                  | 8           |
| 3   | Terms and definitions .....                                 | 8           |
| 4   | Symbols and subscripts .....                                | 9           |
| 5   | Indicators .....  | 9           |
| 5.1   | General .....   | 9           |
| 5.2   | Output data .....   | 9           |
| 5.3   | Input data and calculation time step .....                  | 10          |
| 6   | Calculation methods for energy performance indicators ..... | 10          |
| 6.1   | Simplified approach .....                                   | 10          |
| 6.1.1   | General .....   | 10          |
| 6.1.2   | Single-output district energy systems .....                 | 10          |
| 6.1.3   | Multi-output district energy systems .....                  | 11          |
| 6.2   | Detailed calculation rules .....                            | 11          |
| 6.2.1   | General .....   | 11          |
| 6.2.2   | Generation-related calculation rules .....                  | 12          |
| 6.2.3   | Distribution-related calculation rules .....                | 17          |
| 7   | Calculation of energy source indicators .....               | 18          |
| 7.1   | Renewable energy ratio .....                                | 18          |
| 7.2   | Waste heat ratio .....                                      | 19          |
| 7.3   | Cogenerated heat ratio .....                                | 20          |
| 8   | Report .....  | 20          |
| Annex A (normative) Template for choices, input data and references ..... |   | 21          |
| A.1   | General .....   | 21          |
| A.2   | References .....  | 21          |
| A.3   | Default values for energy carriers .....                    | 22          |
| A.4   | Distribution systems .....                                  | 22          |
| A.5   | Reference values .....                                      | 23          |
| A.6   | Method selection .....                                      | 23          |
| Annex B (informative) Default choices, input data and references .....    |   | 24          |
| B.1   | General .....   | 24          |
| B.2   | References .....  | 24          |
| B.3   | Default values for energy carriers .....                    | 25          |
| B.4   | Distribution systems .....                                  | 26          |

|            |                                       |           |
|------------|---------------------------------------|-----------|
| <b>B.5</b> | <b>Reference values .....</b>         | <b>27</b> |
| <b>B.6</b> | <b>Default method selection .....</b> | <b>28</b> |
|            | <b>Bibliography .....</b>             | <b>29</b> |
