

DIN EN 304:2018-02 (E)

Heating boilers - Test code for heating boilers for atomizing oil burners

Contents		Page
	European foreword	4
1	Scope	5
2	Normative references	5
3	Terms and definitions	5
4	General conditions for testing	5
5	Measurement accuracies and uncertainties	6
6	Measurements for the heating mode	7
6.1	General	7
6.2	Determination of the nominal heat output	7
6.3	Determination of the boiler efficiency at nominal heat output	7
6.4	Performance of testing	8
6.4.1	General test conditions	8
6.4.2	Draught adjustment	8
6.4.3	Establishment of steady-state conditions	8
6.4.4	Test period	8
6.5	Calculation	8
6.5.1	General	8
6.5.2	Nominal heat output	8
6.5.3	Boiler heat input	8
6.5.4	Boiler efficiency	9
6.6	Determination of the waterside resistance	9
6.7	Determination of the standby heat loss	10
6.7.1	General	10
6.7.2	Standby heat loss method 1	11
6.7.3	Standby heat loss method 2	12
6.8	Efficiency at 30 % of the nominal heat output	14
6.8.1	General	14
6.8.2	Efficiency at 30 % - Method 1 (time dependent method)	14
6.8.3	Efficiency at 30 % - Method 2 (load dependent method)	14
6.9	Auxiliary electricity consumption	15
6.10	Seasonal space heating efficiency	16
6.11	Verification of nominal condensing output	16
6.12	Formation of condensation	16
6.13	Functional test for the temperature sensing control type TR and temperature sensing control type STB on the boiler	16
6.14	Surface temperature	20
6.15	Floor temperatures	20
6.16	Limiting temperature of the test panels	20
6.17	Emission values of NO _x and CO	21
6.17.1	General	21
6.17.2	Units	21
6.17.3	Assemblies of a boiler with various burners	21
7	Measurement of the sanitary water production mode	21
8	Test report and other documents	22

Annex A (normative) Calculations for the heating mode	23
A.1 Volume measurement	23
A.2 Calculation of combustion parameters	23
A.3 Determination of air factor (λ) and excess air (e)	27
A.4 Test rigs	28
A.5 Calculation of the nominal heat output P_N	29
A.6 Calculation of the heat input	30
A.7 Calculation of efficiency	30
A.8 Calculation of the heat losses q_A, q_U, q_S	32
A.9 Standby heat loss (P_{Stby})	35
A.10 Calculation of the seasonal space heating energy efficiency	37
A.11 Fuel characteristics	38
Annex B (informative) Applicable symbols and units	40
Annex C (informative) Criteria for the adaptation of forced draught burners using liquid fuels to heating boilers	43
Annex D (informative) Information for setting up and evaluation of the test rig	45
Annex E (informative) Determination of the heat losses of the test rig	46
Annex ZA (informative) Relationship between this European Standard and the ecodesign requirements of Commission Regulation (EU) No [813/2013] aimed to be covered	47
Annex ZB (informative) Relationship between this European Standard and the ecodesign requirements of Commission Delegated Regulation (EU) No [811/2013] aimed to be covered	48
