

# ISO 18566-3:2017-06 (E)

## Building environment design - Design, test methods and control of hydronic radiant heating and cooling panel systems - Part 3: Design of ceiling mounted radiant panels

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Symbols .....	1
5	General design consideration .....	2
5.1	General .....	2
5.2	Panel thermal resistance .....	2
5.3	Panel heat loss or gain .....	3
5.4	Water velocity in pipes .....	3
5.5	Surface condensation .....	4
5.6	Water distribution and piping system .....	4
6	Design processes of hydronic panel systems .....	6
6.1	General .....	6
6.2	Cooling operation .....	6
6.3	Heating operation .....	8
Annex A (informative)	Thermal resistance of ceiling panels and thermal conductivity of typical pipe material .....	10
Annex B (informative)	Heat transfer by panel surfaces .....	12
Bibliography .....		14
