| European foreword..... |  | 4           |
| Introduction .....     |  | 7           |
| 1                      | Scope.....   | 9           |
| 2                      | Normative references.....                              | 9           |
| 3                      | Terms and definitions.....                             | 9           |
| 4                      | Symbols, subscripts and abbreviations.....             | 9           |
| 4.1                    | Symbols.....   | 9           |
| 4.2                    | Subscripts.....  | 9           |
| 4.3                    | Abbreviations .....                                    | 10          |
| 5                      | Brief description of the methods and routing .....     | 10          |
| 5.1                    | Output of the methods.....                             | 10          |
| 5.2                    | General description of the methods.....                | 10          |
| 5.2.1                  | Method 1.....  | 10          |
| 5.2.2                  | Method 2.....  | 11          |
| 5.3                    | Selection criteria between the methods.....            | 11          |
| 5.4                    | Application and implementation of the methods.....     | 12          |
| 5.4.1                  | Method 1.....  | 12          |
| 5.4.2                  | Method 2.....  | 13          |
| 6                      | Calculation method 1 (EN 16798-5-1) .....              | 13          |
| 6.1                    | Output data.....                                       | 13          |
| 6.2                    | Calculation time interval and calculation period ..... | 13          |
| 6.3                    | Input data.....  | 13          |
| 6.3.1                  | Source of data .....                                   | 13          |
| 6.3.2                  | Product data.....                                      | 14          |
| 6.3.3                  | System design data .....                               | 14          |
| 6.3.4                  | Operating conditions .....                             | 14          |
| 6.3.5                  | Constants and physical data.....                       | 14          |
| 6.4                    | Calculation procedure, method 1 .....                  | 15          |
| 6.4.1                  | Applicable calculation interval .....                  | 15          |
| 6.4.2                  | Distribution calculation.....                          | 15          |
| 6.4.3                  | Generation calculation.....                            | 18          |
| 7                      | Calculation method 2 (EN 16798-5-2) .....              | 35          |
| 7.1                    | Output data.....                                       | 35          |
| 7.2                    | Calculation interval .....                             | 35          |
| 7.3                    | Input data.....  | 36          |
| 7.3.1                  | Source of data .....                                   | 36          |
| 7.3.2                  | Product data.....                                      | 36          |
| 7.3.3                  | System design data .....                               | 36          |
| 7.3.4                  | Operating conditions .....                             | 36          |
| 7.4                    | Calculation procedure.....                             | 36          |
| 7.4.1                  | Applicable timestep.....                               | 36          |
| 7.4.2                  | Operating conditions calculation .....                 | 37          |
| 7.4.3                  | Energy calculation .....                               | 39          |

|                |  |            |
