DIN 4753-1:2019-05 (E)

Water heaters, water heating installations and storage water heaters for drinking water - Part 1: Tanks with a capacity of over 2 000 l

Contents

Page

Foreword ... 3

1 Scope ... 4

2 Normative references ... 4

3 Terms and definitions ... 5

4 Requirements ... 6
4.1 General ... 6
4.2 Thermal insulation ... 6
4.3 Protection against corrosion ... 7
4.3.1 General ... 7
4.3.2 Corrosion-resistant designs ... 7
4.4 Construction ... 8
4.5 Design of drinking water heaters ... 8
4.5.1 General ... 8
4.5.2 Calculation ... 9
4.5.3 Experimental strength verification ... 9
4.6 Requirements on the intermediate heat exchanger ... 10
4.6.1 Drinking water side ... 10
4.6.2 Space for the intermediate medium ... 10
4.6.3 Safety device ... 10
4.6.4 Intermediate medium ... 10

5 Equipment for drinking water heating installations ... 10
5.1 Temperature indication ... 10
5.2 Protection and safety equipment ... 10

6 Testing ... 11
6.1 Initial type testing of drinking water heaters ... 11
6.2 Production testing of drinking water heaters ... 11
6.2.1 General ... 11
6.2.2 Leakage test ... 11
6.3 Testing of intermediate heat exchangers ... 11
6.3.1 General ... 11
6.3.2 Space for the intermediate medium ... 11
6.3.3 Safety device ... 11

7 Marking ... 11
7.1 Marking of drinking water heaters and drinking water heating installations ... 11
7.2 Marking of intermediate heat exchangers ... 12

Bibliography ... 13
