

# DIN EN 15632-2:2022-08 (E)

## District heating pipes - Factory made flexible pipe systems - Part 2: Bonded system with plastic service pipes; requirements and test methods

---

<b>Contents</b>		<b>Page</b>
European foreword .....		3
Introduction .....		4
1	Scope .....	5
2	Normative references .....	5
3	Terms and definitions .....	7
4	Classification .....	7
4.1	Operating temperatures and service life .....	7
4.2	Design pressures .....	7
5	Requirements .....	8
5.1	General requirements .....	8
5.2	Service pipes, fittings and their connections .....	8
5.2.1	Quality of service pipes, fittings and their connections .....	8
5.2.2	Oxygen tightness of service pipes .....	11
5.3	Axial shear strength of pipe assemblies .....	11
5.4	Linear water tightness of pipe assemblies .....	11
5.5	Water vapour permeation of pipe assemblies .....	11
6	Test procedures .....	11
6.1	General .....	11
6.2	Thermal cycling test .....	12
6.3	Axial shear strength of pipe assemblies .....	12
6.4	Linear water tightness of pipe assemblies .....	14
Annex A (informative) Application of Miner's Rule - Calculation of the calculated design life of PB-H, PE-X and Multilayer piping systems .....		15
A.1	General .....	15
A.2	Considerations for multilayer piping systems .....	17
Annex B (informative) Guideline for inspection and testing .....		18
