DIN EN 15632-1:2022-08 (E)

District heating pipes - Factory made flexible pipe systems - Part 1: Classification, general requirements and test methods

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions and symbols 7
3.1 Terms and definitions 7
3.2 Symbols, indices and abbreviations 7

4 Classification 11

5 Design requirements 11
5.1 Thermal insulation properties 11
5.2 Bending test 12
5.2.1 Flexibility 12
5.2.2 Ovality 12
5.2.3 Cracks 12
5.3 Resistance to external load 12
5.3.1 Ring stiffness 12
5.3.2 Impact resistance 12
5.4 Thermal insulation 12
5.4.1 Compressive creep 12
5.4.2 Water absorption at elevated temperatures 12
5.4.3 Density of thermal insulation 13
5.5 Casing 13
5.5.1 UV stability 13
5.5.2 Thermal stability of the material 13
5.5.3 Stress crack resistance of the material 13
5.5.4 Use of rework material 13
5.6 Surveillance systems 14

6 Test methods 14
6.1 General 14
6.2 Bending test 14
6.2.1 Flexibility 14
6.2.2 Ovality test 16
6.2.3 Cracks in the thermal insulation 16
6.3 Compressive creep 17
6.3.1 General 17
6.3.2 Principles of testing 17
6.3.3 Test apparatus 17
6.3.4 Test specimen 19
6.3.5 Test procedure 19
6.3.6 Test force and expression of results 20

7 Marking 21
7.1 General marking aspects 21
7.2 Minimum marking information 21

8 Manufacturer's information 22

Annex A (normative) Thermal conductivity of factory made pipes - Test procedure 23

A.1 General 23
A.2 Requirements 23
A.2.1 Test specimen 23
A.2.2 Operating temperature 23
A.2.3 Types of apparatus 23
A.3 Apparatus 23
A.3.1 Guarded end apparatus 23
A.3.2 Calibrated end apparatus 23
A.3.3 Dimensions 24
A.3.4 Heater pipe surface temperature 24
A.4 Test specimen 24
A.4.1 Conditioning 24
A.4.2 Surface temperature measurement 24
A.4.3 Location of temperature sensors 24
A.5 Procedure 24
A.5.1 Test length 24
A.5.2 Diameter and dimension measurement 24
A.5.3 Thickness of casing 26
A.5.4 Ambient requirements 26
A.5.5 Test pipe temperature 26
A.5.6 Power supply 26
A.5.7 Axial heat loss 27
A.5.8 Test period and stability 27
A.6 Calculations - Thermal conductivity 27

Annex B (informative) Determination of design values for the radial thermal resistance 29

Annex C (informative) Guideline for testing 30
