European foreword 5

Introduction 7

1 Scope 8
1.1 General 8
1.2 Fuels 9

2 Normative references 10

3 Terms and definitions 13

4 Requirements 20
4.1 General requirements 20
4.1.1 General requirements for all boilers 20
4.1.2 General requirements for condensing boilers 21
4.2 Construction requirements 22
4.2.1 Production documentation 22
4.2.2 Heating boilers (parts) made of steel 23
4.2.3 Boilers made of cast materials 29
4.2.4 Design requirements 30
4.2.5 Requirements for boilers with outside combustion air supply and room sealed appliances 33
4.3 Safety requirements 34
4.3.1 General 34
4.3.2 Manual stoked boilers 35
4.3.3 Safety against back burning for automatic stoked boilers 35
4.3.4 Prevention of the transmission of toxic components 38
4.3.5 Safety against fuel overload of the boiler or interruption in fuel supply 39
4.3.6 Safety against lack of air supply or insufficient combustion 39
4.3.7 Surface temperatures 40
4.3.8 Leakage of the boilers category 1 40
4.3.9 Temperature control and limiting devices 40
4.3.10 Assessment of additional risk 42
4.3.11 Additional safety requirements for condensing boilers 42
4.3.12 Additional safety requirements for outside air supply boilers and room sealed appliances 43
4.3.13 Heating boiler accessories 43
4.4 Performance requirements 44
4.4.1 General 44
4.4.2 Energy efficiency 44
4.4.3 Flue gas temperature 46
4.4.4 Draught 46
4.4.5 Combustion period 46
4.4.6 Minimum heat output 47
4.4.7 Emission limits 47

5 Test 49
5.1 Test conditions 49

5.1.1 General ... 49
5.1.2 Choice of boiler and fittings to be tested ... 49
5.1.3 Condition of the boiler ... 50
5.1.4 Type test ... 50
5.2 Measuring instruments and methods ... 50
5.3 Test fuel ... 51
5.4 Pressure test for boilers of sheet or sheet metal of non-ferrous metal ... 53
5.4.1 Tests to be carried out before production ... 53
5.4.2 Test during production ... 53
5.5 Pressure test for boilers of cast iron or non-ferrous metals ... 54
5.5.1 Test to be carried out before production ... 54
5.5.2 Test during production ... 54
5.6 Conducting the boiler performance test ... 55
5.6.1 General ... 55
5.6.2 Setting up the test rig ... 55
5.6.3 Measured quantities ... 56
5.6.4 Test method and test duration ... 57
5.7 Determination of the heat output and the efficiency of the boiler ... 57
5.7.1 Method for the measurement of the heat output ... 57
5.7.2 Determining the nominal heat output ... 58
5.7.3 Determining the minimum heat output ... 58
5.7.4 Verification of nominal heat output with condensation ... 59
5.7.5 Verification of the minimum continuous heat output with condensation ... 59
5.7.6 Determination of the boiler efficiency (direct method) ... 59
5.7.7 Electrical consumption ... 59
5.8 Determination of the emission values ... 60
5.8.1 Heating boiler with manual stoking ... 60
5.8.2 Heating boiler with automatic stoking ... 60
5.9 Calculation ... 60
5.9.1 Boiler heat output ... 60
5.9.2 The heat input ... 60
5.9.3 Boiler efficiency ... 60
5.9.4 Emissions ... 62
5.10 Determination of the waterside resistance ... 63
5.11 Surface temperature ... 63
5.12 Verification of condensate ... 64
5.13 Function check of the temperature controller and safety temperature limiter at the boiler 64
5.14 Function test for the rapidly disconnectable firing system ... 64
5.15 Function test on the device for dissipating excess heat (partly or non-disconnectable firing system) ... 65
5.16 Selected tests to demonstrate functional safety ... 65
5.16.1 General ... 65
5.16.2 Safety test of consequences of fuel overload and effect of a blockage of the fuel supply . 66
5.16.3 Loss of combustion air supply ... 66
5.16.4 Resistance to thermal conductance ... 66
5.16.5 Additional tests for alternative verification of the safety against back burning ... 67
5.16.6 Test for gas side leakage ... 67
5.17 Check of safety for condensing operation ... 68
5.18 Additional checks of the safety for boilers with outside combustion air supply ... 68
5.18.1 Test of leakage rates ... 68
5.18.2 Temperature at combustion air connector ... 68
5.18.3 Functional safety and design limits caused by recirculation of flue gas into the combustion air supply ... 68

6 Test report and other documents ... 69

7 Marking ... 70
7.1 General ... 70
7.2 Information on the boiler plate ... 70
7.3 Boiler plate requirements ... 70

8 Technical documentation, supplied with boiler ... 70

8.1 General 70
8.2 Technical information and installation instructions 71
8.3 Operating instructions 73

Annex A (informative) Manual measurement of particles in the gas flow, gravimetric determination of particle load with filter systems 74

Annex B (normative) Design criteria for solutions to prevent back burning 77

Annex C (informative) Installation of boilers with combustion air supply from outside the building .83

Annex D (informative) Recommended limits for substances of content of the condensate 85

Annex E (informative) Recommended analytical methods 86

Annex F (informative) Calculation methods 87

F.1 Calculation of seasonal space heating energy efficiency 87
F.2 Calculation of Energy Efficiency Index (EEI) 89
F.3 Seasonal space heating emissions 89

Annex G (normative) Calculation methods for recirculation influence 91

Annex H (informative) A-deviations 92

Annex ZA (informative) Relationship between this European Standard and the essential requirements of Directive2006/42/EC aimed to be covered 98

Annex ZB (informative) Relationship between this European Standard and the ecodesign requirements of Commission Regulation (EU) [2015/1189] [L 193] aimed to be covered ..100

Annex ZC (informative) Relationship between this European Standard and the energy labelling requirements of Commission Delegated Regulation (EU) [2015/1187] [L 193] aimed to be covered 101
