

DIN EN 15780:2026-07 (E)

Ventilation for buildings - Ductwork - Cleanliness of ventilation systems

Contents		Page
European foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	6
4	Symbols and units	7
5	Criteria for cleanliness and assessment	7
5.1	General considerations	7
5.2	Assessment of the need for cleaning	7
5.3	Design and handing over information	8
5.4	Determination of cleaning interval	8
5.5	Assessment of the cleanliness level after cleaning	8
6	Methodology	8
6.1	General	8
6.2	Assessment methodology	10
6.2.1	General	10
6.2.2	Cleanliness inspection plan	10
6.2.3	Evaluation methods of dust accumulation	11
6.3	Cleaning plan	11
6.4	Cleaning methods	11
7	Evaluation and reporting	12
7.1	General	12
7.2	Evaluation of cleaning	12
7.3	Cleaning report	12
Annex A (informative) Cleanliness quality classes of ventilation systems		14
Annex B (informative) Example of cleaning plan for air ventilation system		17
Annex C (informative) Air handling units - specific guidance		20
Annex D (informative) Specific guidance for filters in air handling units		22
Annex E (informative) Specific guidance for humidifiers in air handling units		23
Annex F (informative) Ductwork - Specific installation guidance for air ventilation system		24
Annex G (informative) Terminal devices and units - Specific guidance air ventilation system		27
Annex H (informative) Measurement methods for dust accumulation - Air ventilation system		28
Annex I (informative) European vacuum test method for measuring dust accumulation in air ventilation systems		31

Annex J (informative) Commercial kitchen extract ventilation system - Specific guidance	33
Annex K (informative) Wiping test method to evaluate cleanliness on site	41
Bibliography	43
